(a) One trial (weather)

Day 6 of 80

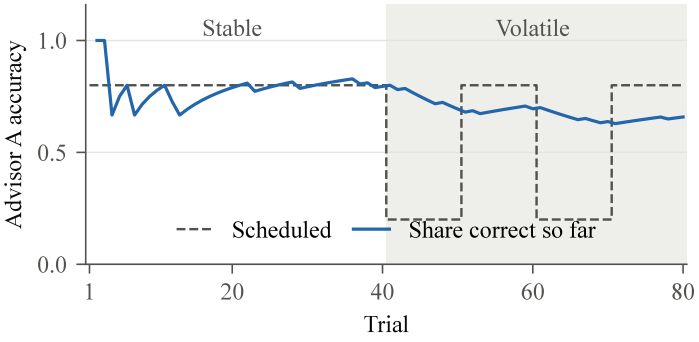

Joe forecasts:

Tim forecasts:

Predict rain or dry, then observe feedback.

Record feedback for subsequent trials.

(b) Example schedule (stable first)

(c) History formats and steps left to the model

Format	Example (abbreviated)	(i)	(ii)	(iii)
Raw	Joe: rain; Tim: dry; actual: rain	●	●	●
Raw + correctness	...rain (Joe correct; Tim wrong)	○	●	●
Correctness only	Joe correct; Tim wrong	○	●	●
Summarized	5 days: Joe correct 4, Tim 1	○	○	●
Described accuracy	Joe correct on 80% of days	○	○	●

Filled: step left to the model. (i) Judge correctness; (ii) integrate history; (iii) use estimate.
